CONTENTS OF THIS TEMPLATE

Here's what you'll find in this **Slidesgo** template:

- A slide structure based on a thesis presentation, which you can easily adapt to your needs. For more info on how to edit the template, please visit [Slidesgo School](#) or read our [FAQs](#).
- An assortment of illustrations that are suitable for use in the presentation can be found in the [alternative resources slide](#).
- A [thanks slide](#), which you must keep so that proper credits for our design are given.
- A [resources slide](#), where you'll find links to all the elements used in the template.
- [Instructions for use](#) and final slides with:
 - The [fonts and colors used](#) in the template.
 - A [selection of illustrations](#). You can also customize and animate them as you wish with the online editor. Visit [Storyset](#) to find more.
 - More [infographic resources](#), whose size and color can be edited.
 - Sets of [customizable icons](#) of various themes.

You can delete this slide when you're done editing the presentation.

INTRODUCTION
Evaluation only.

Created with Aspose Slides for Python via .NET 25.9.

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

  **Evaluation only.**
"This is a quote. Words full of wisdom that
someone important said and can make the
reader get inspired."

MARS

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's a bit larger than our Moon

VENUS

Venus has a beautiful name and is the second planet from the Sun. Its atmosphere is extremely poisonous

LITERATURE REVIEW

01 THEORY

Neptune is the farthest planet in our Solar System. It's the fourth-largest by diameter and the densest

02 THEORY

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

03 THEORY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon

04 THEORY

Jupiter is a gas giant and the biggest planet in our Solar System. It's also the fourth-brightest object in the sky
